Work Experience

Web Developer @ Treue Technologies, Pune [🔗](#)

Sept 2023 - Oct 2023 (1 month) | Part-time

- Web Development and Designing
- As a Frontend Developer, collaborated with a team of developer to design and develop the frontend of various web application using HTML, CSS, Bootstrap and Javascript
- Landing Page - A beginner web project: Create an attractive landing page using HTML and CSS. Focus on layout, sectioning, headers, footers, color schemes, and alignment for a polished display of web development skills. Calculator - Develop a feature-rich calculator using CSS, HTML, and JavaScript. Create an interactive interface with error handling, memory functions, and unit conversion for a seamless user experience, demonstrating strong web development skills.

Skills Developed: HTML, CSS, Bootstrap, Javascript

Web Developer @ Prodigy InfoTech, Mumbai [🔗](#)

Nov 2023 - Present (1 month) | Semi-fulltime

- Responsive Landing Page - The navigation menu should have a fixed position and be visible on all pages. Personal portfolio website - Design an attractive and visually appealing layout that captures visitors' attention. Include a home page with a captivating headline, professional photo, and summary of your skills. Weather App - Blue Gradient Square Circle with gradient Blue Gradient Square Circle with gradient Blue Gradient Square Build a web page that fetches weather data from a weather API based on the user's location or a user-inputted location. Display the current weather conditions, temperature, and other relevant information.
- Build a web page that fetches weather data from a weather API based on the user's location or a user-inputted location. Build a personal portfolio website that showcases your skills, projects, and accomplishments as a web developer. Design an attractive and visually appealing layout that captures visitors' attention. Include a home page with a captivating headline, professional photo, and summary of your skills. Provide an "About Me" section with a detailed background, education, and professional experience.
- Create an interactive navigation menu that changes color or style when scrolled or when hovering over a menu item. The navigation menu should have a fixed position and be visible on all pages. Use HTML to structure the menu, CSS to style it, and JavaScript to add interactivity, such as changing the background color or font color of the menu when it is scrolled or when a menu item is hovered over. I try my hands on the video conferencing website and application projects and help develop features like textual chatting, audio-video interactions, video recording, etc

Skills Developed: HTML, CSS, Bootstrap, Javascript, Angular, MongoDB, SQL

Data Structures In JAVA - Coding Ninjas

Web Developer @ CodersCave, Coimbatore

Nov 2023 - Dec 2023 (1 month) | Part-time

- NETFLIX clone web page - "Developed a user-friendly Netix clone web page, replicating the interface for seamless browsing of movies and TV shows. Designed with a focus on user engagement, allowing exploration of a diverse collection, demonstrating adeptness in web development, and frontend programming .
 - Meal Plan Generator - Developed a meal plan generator using HTML, CSS, and JavaScript integrating Edamam Nutrition's recipe search API. Enabled user input for meals, dietary preferences, calorie intake, and fetched recipes accordingly. Styled with a dark theme, responsive layout, and a centered, box-shadowed design for an enhanced user experience.
 - utilizing HTML, CSS, and JavaScript for front-end
- Skills Developed: HTML, CSS, Javascript

Web Developer @ Oasis InfoByte, Delhi

Nov 2023 - Dec 2023 (1 month) | Full-time

- Temperature Converter - Developed a Temperature Converter Website allowing input in Celsius/Fahrenheit, displaying converted temperatures with correct units, incorporating validation and optional Kelvin conversion.
- Login Authentication - Developed a login authentication system enabling user registration, login, and access to a secured page using JavaScript.
- Unit Conversion Tool - Developed a Unit Conversion Tool for length, allowing input in meters, unit selection, and conversion to centimeters using HTML, CSS, and JavaScript. Showcased UI design and diverse unit conversion capabilities.

Skills Developed: HTML, CSS, Javascript

Web Developer @ CodSoft, Kolkata

Nov 2023 - Nov 2023 | Semi-fulltime

- Developed a personal PORTFOLIO using CSS/HTML, showcasing skills in web development. Included headers, bio, skills, and project sections, reflecting expertise. Resume download link and contact info provided .
- To-Do List - Developed a functional to-do list app utilizing HTML, CSS, and JavaScript for front-end; integrated task storage via local storage or backend server Node.js.
- Calculator- Developed an interactive calculator using CSS, HTML, and JavaScript, implementing arithmetic operations with event listeners, loops, and if-else statements. Utilized CSS grid for button alignment .
- Tribute Page- Developed a Tribute Page showcasing admiration for a guru using HTML and CSS. Incorporated admirable qualities, images, and visually appealing design with font styles, effective paragraphs, and background colors to express admiration.

Skills Developed: HTML, CSS, Javascript

- It enhances your proficiency in Java programming, enabling you to choose the right data structures for optimized efficiency. These skills find applications in real-world software projects, improve interview readiness, and foster better software design. Understanding diverse data structures like arrays, linked lists, trees, and hash tables allows you to handle various problem domains. Moreover, in data science and machine learning, it's vital for data manipulation. Java offers a robust platform for honing these skills, and numerous resources are available to get started.

MTA: Introduction to Programming Using Java - Coding Ninjas

- An introduction to programming in Java provides a solid foundation in computer programming. You'll learn essential concepts like variables, data types, control flow, and object-oriented programming. Understanding Java's syntax, data structures, and basic algorithms will enable you to write efficient and functional code. You'll also gain skills in error handling, file I/O, and debugging. Using integrated development environments (IDEs) and version control systems enhances your productivity. This knowledge opens the door to various software development opportunities, and I'll be capable of creating basic Java applications. It's a crucial starting point for both beginners and those looking to build their programming skills in Java

September 2022 | [Certificate Link](#)

Technical Support Fundamentals

- Troubleshooting Skills: Diagnosing and resolving technical issues efficiently. Customer Service: Providing effective support and communication to assist users. Operating Systems: Understanding system functionalities and configurations. Networking Fundamentals: Basics of networks, internet protocols, and connectivity. Hardware Basics: Knowledge about computer hardware components and troubleshooting. Software Applications: Familiarity with various software applications and their functionalities. Problem-solving: Methodologies to identify and solve technical problems effectively.

Getting Started with Data Analytics on AWS

Projects

Landing Page - RESUME

- Create an attractive landing page using HTML and CSS, JavaScript .

- Focus on layout, sectioning, headers, footers, color schemes, and alignment for a polished display of web development skills.
- A Responsive web project: Create an attractive landing page using HTML and CSS. Focus on layout, sectioning, headers, footers, color schemes, and alignment for a polished display of web development skills.

Skills Developed: HTML, CSS, Javascript, Bootstrap

Calculator

- Conversion for a seamless user experience
- Develop a feature-rich calculator using CSS, HTML, and JavaScript.
- Develop a feature-rich calculator using CSS, HTML, and JavaScript. Create an interactive interface with error handling, memory functions, and unit conversion for a seamless user experience, demonstrating strong web development skills.

Skills Developed: HTML, CSS, Javascript

Unit Conversion Tool

- BY Unit Conversion Tool, convert Length into different variations.
- Input meters, select units, and convert to centimeters with a "Convert" button.
- Design a user-friendly interface to input meters, select units, and convert to centimeters with a "Convert" button. Optionally, add more unit conversion choices. Demonstrates UI design and unit conversion skills.

Skills Developed: HTML, CSS, Javascript

Quotes or Testimonials

- Highlight and admire persons' impact, character, and accomplishments to inspire and motivate visitors.
- Visually engaging display of inspirational quote
- Create a visually engaging display of inspirational quotes and testimonials about your admired person. Highlight their impact, character, and accomplishments to inspire and motivate visitors.

Skills Developed: HTML, CSS, Bootstrap

Portfolio

- Creating a Professional Presence: Building an online platform that represents my professional brand and personality.
- Planned audience, designed wireframes, developed using HTML/CSS, integrated projects, tested functionality, and launched a responsive portfolio showcasing skills and experiences.
- Showcasing Skills: Demonstrating proficiency in web development, including HTML, CSS, JavaScript, and other relevant technologies. Highlighting Projects: Presenting previous work, personal projects, or assignments to display your capabilities and expertise.

Skills Developed: HTML, CSS, Bootstrap, Javascript

To-Do-list

- Efficient task organization, aiding task creation, tracking, and completion for enhanced productivity and time management.

- AWS Services: Mastery of AWS services like Amazon Redshift, Athena, QuickSight for data analytics. Data Preparation: Learned techniques for data cleaning, transformation, and preparing data for analysis. Analytics Tools: Understanding and usage of various analytical tools within AWS ecosystem. Querying Data: Proficiency in querying datasets efficiently for insights and analytics. Data Visualization: Skills in creating visualizations to represent data using AWS QuickSight or similar tools. Data Interpretation: Ability to derive meaningful conclusions and actionable insights from analyzed data. Cloud-based Analytics: Understanding the advantages of cloud-based analytics and its applications.

November 2023 | [Certificate Link](#)

- Planned, designed, developed with JavaScript, integrated task functionalities, tested, and deployed a user-friendly To-Do-list application.
- Task creation, deletion, and completion functionalities, priority sorting, due date setting, and categorized task lists for effective organization.

Skills Developed: HTML, CSS, Javascript

Netflix Clone

- Develop a web page mirroring Netflix interface to enable browsing movies/TV shows, providing engaging, user-friendly experience for familiarity and practice.
- Researched, designed UI wireframes, coded using HTML/CSS/JavaScript, integrated API, tested functionality, and deployed a functional Netflix clone.
- Netflix Clone project features: Mimicked Netflix interface, enabled browsing, exploring movies/TV shows, providing engaging, user-friendly experience for users.

Skills Developed: HTML, CSS, Javascript

Position of Responsibility

Web Developer

- As a Frontend Developer, collaborated with a team of developer to design and develop the frontend of various web application using HTML, CSS, Bootstrap and Javascript.
- Design responsive user interfaces and worked closely with the UX/UI team to ensure design consistency and seamless integration of design element.
- Conducted code review and implemented continuous integration and deployment pipelines using tools such as GitLab and Jenkins, resulting in more efficient development processes.
